

Barcode Scanning

23/10/2024 2:28 pm BST

Summary

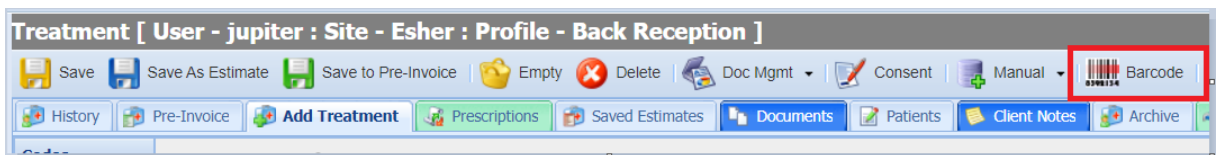

As an alternative to adding treatment using the methods documented in [Adding Treatment](#), items can be scanned using a hand-held device.

In order to use this functionality, [barcode data](#) will need to be imported into Merlin.

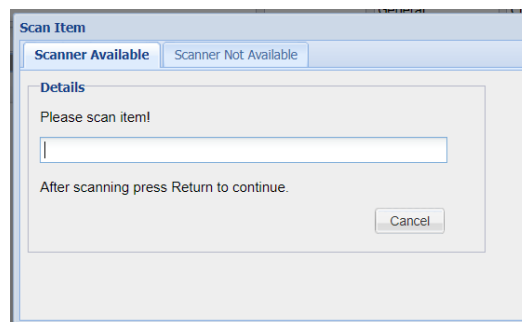

Details

Scan an Item - Add Treatment

1. Enter the '**Add Treatment**' Screen (Treatment > Add Treatment tab).
2. Select the '**Barcode**' button.

3. The '**Scan Item**' screen will display. Use your hand-held device to scan a product.

4. The item will add to the **treatment draft**.
5. Select '**Save**' to save the item to treatment history.
