

# VetCheck Settings

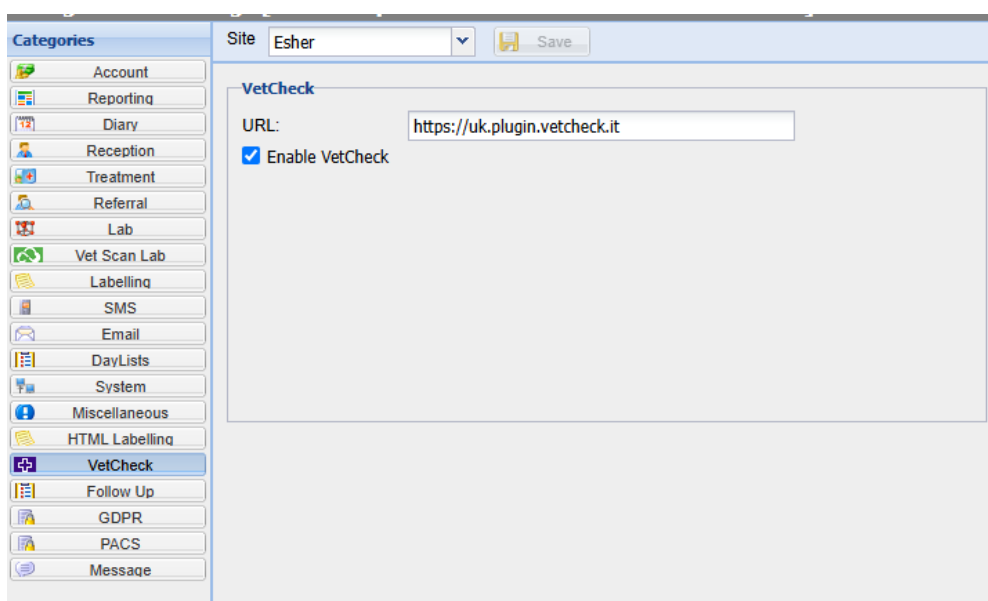

28/08/2025 11:49 am BST

## Summary

VetCheck settings can be found via Administration > Settings > VetCheck

## Details

There are minimal settings in here. They are used when VetCheck is enabled for a practice and the URL is inserted once the module is enabled.

The screenshot shows a software interface for configuring VetCheck settings. On the left is a vertical sidebar titled "Categories" containing a list of system modules: Account, Reporting, Diary, Reception, Treatment, Referral, Lab, Vet Scan Lab, Labelling, SMS, Email, DayLists, System, Miscellaneous, HTML Labelling, VetCheck (highlighted in blue), Follow Up, GDPR, PACS, and Message. The main content area at the top has a "Site" dropdown menu set to "Esher" and a "Save" button. Below this, the "VetCheck" section is active, displaying a "URL:" label followed by a text input field containing "https://uk.plugin.vetcheck.it". A checkbox labeled "Enable VetCheck" is checked with a blue square.
